Dear Tom:

I would like to let you know how much I appreciate all of the educational benefits that NACM provides. I have learned so much from each class which has been very beneficial for me at work. I am able to understand more of the credit and financial side which in turn helps me make a more knowledgeable decision. Our teacher Sam teaches us by giving us real situations in which we will use the skills he is teaching. Instead of the regular professors I am use to it is wonderful to have someone that has been a credit manager and has worked in the field that he is teaching.

Sincerely,

Kathy Fisk
